## RESUMEN

Full-Stack Software Engineer with over 5 years of experience delivering web solutions using technologies like .NET, Angular, and Azure. A collaborative problem-solver focused on writing clean, maintainable code and adapting to new technical challenges.

## SKILLS

### Languages

- Typescript / JavaScript
- C# • Python
- JSON / XML

### Front-end

- Angular / React
- PrimeNG / Material UI
- Node.js / npm

### Back-end

- .Net Core / EF
- REST APIs / MSSQL
- Swagger / Postman

### Other Tools

- Azure DevOps
- Docker
- Git

## EXPERIENCE

### SOFTWARE ENGINEER

NexPay Pty Ltd - [nexpay.com.au](https://nexpay.com.au) | Dec 2023 - Present | Australia

- Maintained and improved an international payments solution, managing the full stack (.NET backend, public APIs, MSSQL databases, and an Angular/Razor frontend) and its Azure CI/CD pipelines.
- Planned and implemented a modern version of a legacy web application, improving its testability, maintainability, and deployment structure while managing the CI/CD pipeline with Azure DevOps.
- Developed a templated email notification service using a .NET consumer for an Azure Service Bus queue.
- Built a responsive frontend application with Angular19, Tailwind, and PrimeNG, using Signals for state management to improve performance and simplify the codebase.

### FULL STACK DEVELOPER

JBKnowledge - [jbknowledge.com](https://jbknowledge.com) | Nov 2022 – Dec 2023 | Argentina

- Multi-purpose project configuration and integration between libraries and setups. Angular15, Storybook, Tailwind, React Microfrontends within Angular, MSW mock requests, MSAL auth interceptors, PowerFX editor, among others. Building modular, generic, optimized and scalable Angular15 libraries and components.
- Developing, fixing and improving APIs for multiple projects, using .NET Core / C#. Code-First database approaches using Entity Framework. Event-based database management using Azure Cosmos DB.
- Working using agile workflows (User Stories / Scrum). Hands-on involvement in all parts of a project, implementing Frontend, Backend and DB from the ground up, documenting development good practices.

### FULL STACK DEVELOPER

Diveria S.R.L. - [diveria.com](https://diveria.com) | Nov 2020 – Nov 2022 | Argentina

- Building modular frontend libraries and components to optimize development speed and improve page loading times (Angular13). Developing, fixing and improving APIs for multiple projects (.NET Core).
- Migrating and refactoring legacy Sharepoint / Knockout.js code to Angular13, improving code implementation and readability.
- Developing automated web-scraping, data processing, csv/xlsx report exporting scripts using Python.
- Working using agile workflows (User Stories / Scrum), with both in-house developer teams and clients.

### RESEARCH AND DEVELOPMENT INTERN

sinc(i) - [sinc.unl.edu.ar](https://sinc.unl.edu.ar) | Sep 2019 - Oct 2021 | Argentina

- Developing a Python tool for estimating voice from EEG records in the context of imagined speech.

## EDUCATION

SOFTWARE ENGINEERING | GPA 3.7 (8.8 avg.)  
UNL – FICH | 2022

## LANGUAGES

- SPANISH | Native
- ENGLISH | Advanced – IELTS 8.0
